Step 4.

In 3-5 sentences, please share an overview of your and/or your team's process of creating wireframes or a prototype. What was the most challenging thing about the process of creating your wireframes or prototype? What did you learn?

Our team used the Miro app to create wireframes for a new app centered around women booking a mentor to learn leadership skills. However, we encountered some challenges when it came to using the app because it required a pro subscription which we had to purchase. Also, navigating the app was difficult at first since it was our first time using the Miro app. Despite these challenges, we were able to create a prototype that effectively conveyed our app's features and functionality.

Through this process, we learned the importance of thorough preparation and research before beginning a design project and the value of perseverance in the face of unexpected challenges.

Step 5.

What are the names of the 2 people who you and/or your team conducted user interviews with?

1. Abere-Ola Victoria Oluwatobiloba
2. Okpabi Obarijima

Step 6.

Please describe at least 4 pieces of feedback that you received from your users and whether or not you plan to take action on it.

1. A user suggested that the actual application should incorporate blue and greens as they are more user-friendly
2. The profile page is too congested a user suggested adding more whitespace
3. The positioning of the items on the profile page isn't very user friendly a different structure should be applied however user didn't indicate or suggest a different approach
4. The mentor booking page requires more whitespace as it looks too crowded
5. A user noticed spelling errors as well

All feedback will be acted upon as they are all necessary for a better user experience.
